Effective Communication

Time Management

# JEDIDIAH AKINBOYOWA

I am a Web Developer with a lot of passion for coding and embracing challenges. I am on a journey of professional growth as well as learning from and sharing with other creative personnel.

I am currently looking for the right opportunity to work in an environment that will help me progress into a better Web Developer, as well as a better person so that I can become more valuable.

## WEB DEVELOPMENT EXPERIENCE

### Face Recognition App

Languages: HTML5, CSS3, JavaScript, NodeJS, Express, PostgreSQL

Built a web application that detects human faces when an image url is inserted in a box provided after a user has been prompted to Register or Sign in. This project has a Front-end using ReactJS and a Back-end where there is a RESTful API server with Express and was deployed to Heroku. The application also stores user information such as username and also hash passwords securely using bcrypt in a database on postgres

### Robot Search

Languages: HTML5, CSS3, ReactJS, NodeJS

Built a web application that fetches JSON objects (robots) and displays their picture and name on cards. It actively searches through objects when a user is typing into the search bar. Robot pictures are automatically generated from robohash.org

### Gradient Generator

Languages: HTML5, CSS3, JavaScript

Built a web application that generates rgb values for each color selected. This project is a Gradient Color Generator. The generated rgb color can be copied and used for styling web pages and in CSS.

## EDUCATION

B.sc Physics

UNIVERSITY OF LAGOS, AKOKA, NIGERIA

2012-2017
